History of the Old School

In the year 1905, by a vote of 50 to 28 electors of Jt. District No. 1 of the Town of Mishicot elected to replace the two room frame school house by a two room brick structure. The frame school is still in use today as a village hall. For the past four years it has also served as a music room for the high school. At a later meeting it was decided to change the plans to erect a four room, two story brick school at a cost of $6,000.00, with upper rooms not finished. By 1906 the upper rooms were completed and ready to accept 9th grade students. By 1915, 10th grade was added.

The demand for a four year high made necessary an expansion program. The first class of a four year high school graduated in 1918. In 1920 the voters favored the addition of a large auditorium and three class rooms which was built to the north and was of the same design as the structure to which it was attached. The cost of this addition was $37,000.00.

As the years passed the curricular needs and enrollment increased. In 1940 agriculture was added. Plans were made for the addition of a gym and four class rooms. The war interrupted these plans. With the advent of transportation by school bus the enrollment grew to 225 making these plans obsolete.

In 1950 homemaking was added and the first division of the auditorium into classrooms was made. Subsequently, it became three class

rooms and the stage was eliminated. The basement housed a commercial room, band room, wash room, kitchen and lunch room. In the final year as both a grade and high school, the building housed 318 high school students and 77 grade students. Seven buses were used to transport these students.

In the fall of 1958, the building will become an elementary school. All of the seventh and eighth grade students of the integrated district will be educated here. In all, seven elementary teachers will instruct 215 grade children.

History of the New School

As the high school enrollment grew in the post war era, it became evident that new high school facilities were necessary. The school board in cooperation with the County School Committee began to conduct a series of meetings in the grade schools of the high school service area. Later a citizens' committee made a study of the Union high school form of school district organization, and meetings were again conducted in the area. In the spring of 1954 a referendum was held o nthe formation of such a district. The District proposed contained the Village and Town of Mishicot, Two Creeks, parts of Gibson, Kossuth, Two Rivers, and Cooperstown. The electors defeated the proposal. In the meantime the LaSalle and Kettle Range school districts saw fit to join with Mishicot Jt. 1 for all school purposes.

In January of 1956, the board of Mishicot Jt. 5 decided to study the possibility of joining. They invited about 13 other districts to an informal meeting. As a result of this meeting, it was decided to hold meetings in each of these rural districts to discuss reorganization on an integrated plan. Petitions to attach followed these meetings. On July 1, 1956 through Town Board action, the following districts were attached: Mishicot No. 3, Mishicot Jt. 5, Mishicot No. 6, Mishicot No. 7, Gibson No. 1, Gibson No. 2, Gibson No. 3, Gibson Jt. No. 3, Gibson Jt. No. 6, Two Creeks No. 2, and Two Rivers No. 7.

In Feb. of 1957, the electors by an overwhelming majority voted to conduct a referendum on a $575,000.00 bond issue to build and equip a new high school. In April of 1957, the referendum carried by a two to one margin.

Bids were let on July 16, 1957. Ground was broken July 26. The cornerstone was set by Oct. 5, and the building was completed three months ahead of schedule on April 10, 1958.

The 54,800 square foot school containing facilities to house 500 students shall serve as a monument to the egorts of the board members of the districts involved in the reorganization and the foresightedness of electors who approved the issue.

My Sincere Appreciation . . .

As chairman of the General Committee, and in behalf of the committee, I wish to express my thanks to all those too numerous to mention, who have contributed their time and efforts in various ways to make this program a success.

My thanks are extended to the members of the many sub-committees who worked so conscientiously, and have given freely of their time, which was of inestimable value to the performance of this function; to the many graduates who were so helpful in the various necessary phases of work to be done, including the graduating class of 1958, the last class to graduate from the old school; to the members of the Board of Education who have been so cooperative, and especially to Mr. Otto Schultz, Supervising Principal of the Mishicot Community School, who has been so helpful in planning accommodations and furnishing data and material of historical value, and to the many donors and advertisers who have contributed so greatly toward this program.

I also wish to express my sincere thanks to Mr. and Mrs Edward Zima, who freely accommodated this committee in the recreation room of their home for the numerous meetings that have been held in the many months of planning this "Reunion of Classes of Mishicot High School."

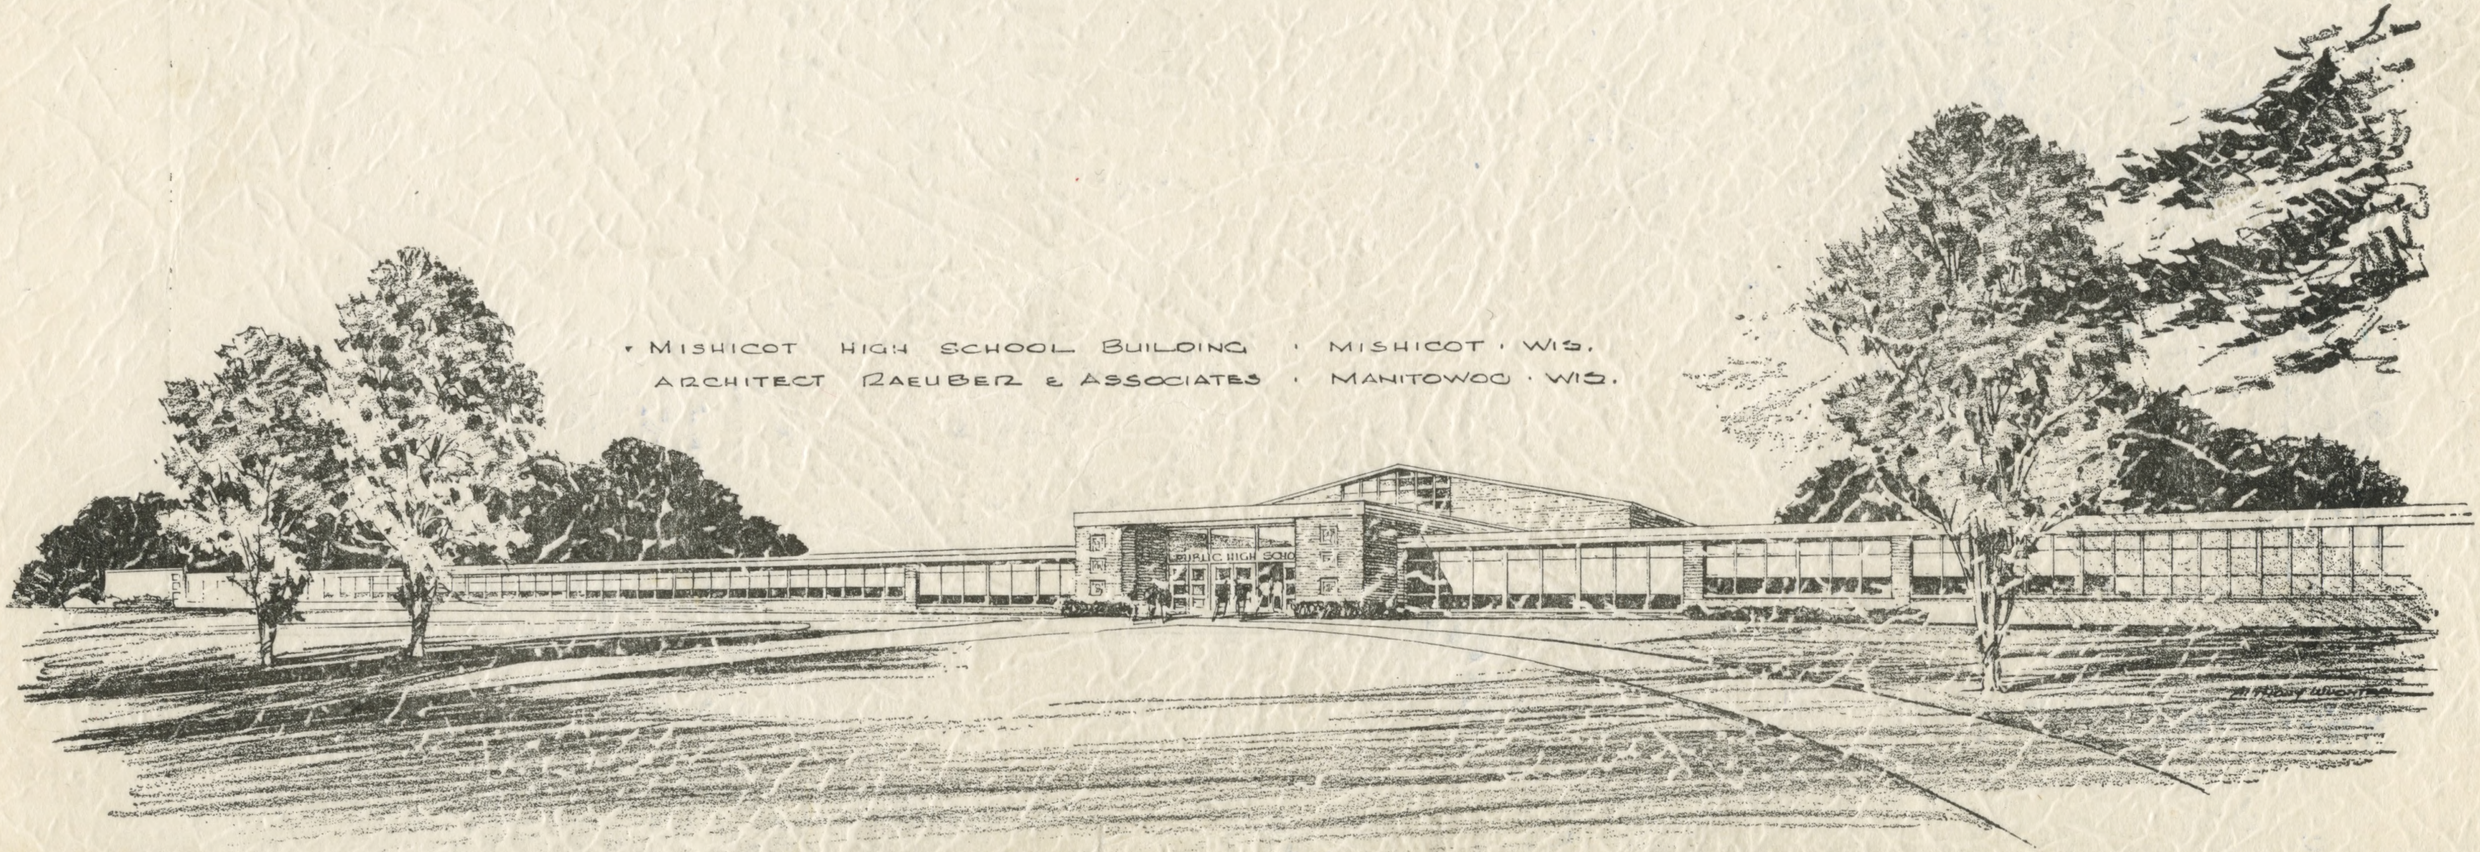
Hamann

CONSTRUCTION COMPANY

MAIN OFFICE—408 Commercial St., Manitowoc, Wis.
BRANCH OFFICE—1670 Morrow St., Green Bay, Wis.

The Mishicot Community School was designed by Frederick W. Raeuber & Associates, Manitowoc, Wis., and constructed by Hamann Construction Company, also of Manitowoc. It incorporates facilities adequate to maintain an efficient operating school, so necessary for this community. Because of a limited budget, economy has been obtained, with no loss of fine architectural appeal, through the foresightedness of our architect, Frederick W. Raeuber and his Associates.

The building contains 54,800 feet of floor space. Total cost of the building with equipment is $605,000.00. Built of a complete brick exterior, with all aluminum windows and doors, it contains ten class rooms, Homemaking and Science laboratories, Agricultural and Industrial Arts rooms, Music rooms and practice room, boiler room, teachers' Lounge, Kitchen and Multi-purpose rooms, Library, Gymnasium and Stage, boys' and girls' Showers and Locker rooms, Commercial class rooms, Administrative unit, balcony Lounge and Wash Room facilities.

The building site is ample to provide parking facilities for busses and automobiles, recreational areas for football, baseball, tennis and other sports.


This building is a mile-stone in the educational progress in this community.
